Course Description and Philosophy

For this course societal wealth venturing is defined as entrepreneurship used as a market-based catalyst to profitably confront social problems. This definition views societal wealth venturing as a distinct alternative to public sector initiatives. The basic thesis is that many social problems, if looked at through an entrepreneurial lens create opportunity for someone to launch a venture that generates profits by alleviating that social problem. This sets in motion a virtuous cycle – the entrepreneur is incented to generate more profits and in so doing, the more profits made, the more the problem is alleviated.

However, this is by no means a simple challenge. It involves deeply understanding how to prioritize a multi-mission entity, how to analyze and engage traditional agencies, how to formulate political strategies to develop influence and social assets in target beneficiary markets, how to forge negotiating strategies for securing resources, how to capture publicity for the enterprise, and generally how to minimize resource requirements. Even if it is not possible to eventually create a profit-making enterprise, the process of planning to do so can lead to a resource-lean not for profit.

Note: MGMT 806: *Formation and Implementation of Entrepreneurial Ventures* and MGMT 810X apply a common theoretical framework to businesses with differing value propositions; therefore, students should **not** plan their course of study to include both of these courses.

Societal Wealth Venture Business Plan

In this course we will begin to demonstrate the validity of this societal entrepreneurship thesis. Student groups will conceive of possible social wealth generating ventures and then develop a plan to seed the formation of a business to implement the social solution as a formal experiment. Our hope is that a meaningful fraction of these plans will result in the actual launch of a societal wealth generating enterprise.

The development of business plans for societal wealth venturing poses a unique and significant challenge. Unlike a conventional course in entrepreneurship where the main focus is on the creation of a rent-generating enterprise, in this course we will be looking at the combination of analysis of the social problem plus the potential of its rent-generating enterprise, followed by the development of a business plan. In addition, seeking viable funding sources for social enterprises also presents unique challenges. Funding for these ventures may stem from nontraditional sources such as not-for-profit foundations which are disposed to provide funding for the alleviation of social problems. Thus a major component of the course is for teams of students to develop a Venture Business Plan. Individual students' grades will be determined by the score their team receives, adjusted by a peer review rating of their contribution, as described below.

"Live Case Study" Methodology

Instead of traditional cases this course will employ what we call a "live case" methodology. The projects on which the student groups are working will be used as live cases to demonstrate the principles to be applied in societal wealth venture situations. Instead of student groups having to prepare written cases we will employ live case methodology in the course through active discussion of the projects which the students are developing. In the live case study, a student will present operational or strategic challenges that he or she is facing in the societal wealth venture. Class members will be expected to participate in the live case studies by making suggestions and presenting possible solutions to the speaker's challenges.

Readings Report

In addition, a considerable component of the course will involve your reading and internalizing theoretical materials germane to societal wealth venturing. You should

submit a readings report which summarizes the key insights you obtained from the readings and the degree to which they applied to your projects.

Readings report description

You will be required to submit a five page report describing how the bulkpack (not textbook) readings applied to your societal venturing project.

The structure is simple: Pick the five readings that you think were the most useful for a decision your team made about your venture. The reading does not have to support your decision, but please explain what concepts and conclusions were useful to you and how you incorporated the learnings into your venture.

Appendix: List all readings (including your five) and rate each reading's usefulness along the spectrum: no value, some value, useful, very useful. At the end of the appendix also include recommendations of any readings your team is aware of that did not appear in the required readings list, but you feel should be included. This report will then be used to improve the readings for this course.

The readings report will count 20% towards your final grade

Prerequisites

MGMT230 or MGMT801 are strongly recommended prerequisites. It is expected that much of the materials covered in MGMT 230 or MGMT 801 will have already been mastered or will be mastered early in this course.

The assigned readings in the course are in the range of moderate to heavy, particularly at the beginning of the course. For each session the required readings must have been studied in advance.

From time to time, mid-course changes in presentations or materials may be made to accommodate schedule changes of visiting speakers.

Bulkpack

The bulkpack is divided into two components: Required Readings and Supplemental Materials. Mastery of the Required Readings should be demonstrated in the final business plan presented at the end of the program. The Supplemental Materials are

provided for those students who are determined to pursue a career in entrepreneurship focused on societal wealth generation and want more insight and depth of understanding of the challenges they will face. This is not a career choice for the faint of heart.

Venture teams

Extensive group work outside of class is an essential part of this course. Course participants are to form new venture teams of five students whose talents, skills and knowledge are complementary. To the extent possible, the formation of teams should begin before the first class. Other factors crucial to your team's functioning are the management and coordination of group effort by appropriate means (telephone, eRoom, e-mail, sub-group meetings, etc.).

GRADING

Team and individual performance will be measured in determining the final grade of each student. Therefore, individual grades are likely to vary within each team.

The team grades will be determined as follows:

Venture business plan The overall quality and cohesiveness of the written Venture Business Plan will count 60% toward the grade, but for the individual team members this will be adjusted by the team's weighting of their individual contributions. Individual contribution to the team performance in the conceptualization, development, and presentation of the VBP will be determined through peer review. The peer review scheme is as follows:

You will be asked to use the TEAM MEMBER EVALUATION FORM (attached at the end of the syllabus) to rate the contribution of each of the team members by assigning a percentage effort score to that member. These scores will be used to calculate the weight that will be applied to the individual's teamwork as illustrated by the example below:

Percent given		to A	to B	to C
% given	by A	NA	100	65
	by B	85	NA	55
	by C	75	100	NA
Average		80	100	60
Grand Avg. = $(80 + 100 + 60) / 3 = 80$				
Weighting — Avg./Grand Avg.:		80/80	100/80	60/80
Adjustment		1	1.25	.75
<p>So if the team score was 50 points then:</p> <p>A would get $1.00 \times 50 = 50$</p> <p>B would get $1.25 \times 50 = 62.5$</p> <p>C would get $0.75 \times 50 = 37.5$</p>				

Class participation throughout the semester determines 25% of the final individual grade. Class participation will be determined by considering your attendance and active participation in class discussions. Your ability to demonstrate that you have prepared the materials assigned to a particular class and both the quality and the quantity of your contributions will be evaluated.

Readings report. You should submit a readings report which summarizes the key insights you obtained from the readings and the degree to which they applied to your projects. This will count 20% in your final grade.

To repeat, the following weights determine the final course grade:

60% of your grade will be based directly on the grade given to the team for the VBP, **adjusted by the group weighting system described above**

20% of your grade is based on individual class participation and presentations

20% of your grade will be based on the readings report

Some ground rules: If you elect to take this class you are assumed to agree to the following conditions:

1. You recognize that the course is graded to a curve. There will be no more than 15% As and 40% Bs in the class. There will be at least 10% LTs in the class
2. You recognize that the instructor will take great care to grade as fairly and evenly as possible and will not discuss grades at the end of the course.
3. You recognize that if you work in a group then a significant percentage of your grade will be dependent on group work and will therefore abide by the weighting score developed from your peer group members' ratings of your contribution.

Confidentiality

The University is a community for the exchange of ideas and knowledge; policy discourages confidentiality arrangements. In those instances where confidentiality does not interfere with learning, the instructor will honor requests for confidentiality of student projects on a case-by-case basis. Students will be expected to respect the intellectual property of others.

DETAILED SYLLABUS

The numbers in the column headed “Readings” are the numbers of the articles in the readings list below. Required Textbook Chapter readings are labeled CH X and follow the readings number

Session	Date	TOPIC	Readings
1	Jan 14	Introduction	CH1
2	Jan 21	Identifying societal wealth ventures: Presentation of venture ideas	2,3, 7, CH2
3	Jan 26	Consumption Chain Analysis - PATH case	5, 22, CH3
4	Jan 28	Consumption Chain and Nearest Competitive analysis – Acumen case	1,21, CH4
	Feb 2	Consumption chain workshop session	6, 16,17
	Feb 4	Societal Wealth venture planning - Acumen case	21, 23
	Feb 9	Business plans for societal wealth	18, 19
5	Feb 11	Discovery Driven Planning – Framing and scoping	CH10
6	Feb 16	Guest Speaker: Jim Thompson	13
7	Feb 18	DDP Framing; working session	
8	Feb 23	Discovery Driven Planning – Deliverables and CheckPointing Consumption Chain and Attribute Map due	4, 9
9	Feb 25	DDP deliverables working session	
10	Mar 2	Discovery Driven Plan simulations DDP due	CH5
11	Mar 4	Venture Politics – Basics	8, 11
12	Mar 16	Political strategy for societal wealth ventures DDP simulation due	TBA
13	Mar 18	Group Consultations	
14	Mar 23	Social assets and social asset building	19
15	Mar 25	Social Assets working session	CH11
16	Mar 30	Publicity Strategies	10
17	Apr 1	Critical negotiation strategy	12, 14
18	Apr 6	Guest speaker: Alicia Polak	20
19	Apr 8	Bottom of the pyramid	15
20	Apr 13	Bottom of the pyramid Working session	CH12
21	Apr 15	Group consultations Publicity strategy due	18
22	Apr 20	DRAT Analysis	CH9
23	Apr 22	Disengagement	CH13
24	Apr 27	Wrap up Business Plan and Readings Report due
