Course Overview

Financial statements are a primary means for firms to communicate information about their performance and strategy to investors and other groups. In the wake of numerous accounting scandals and the recent financial meltdown (which accounting both helped and hindered), it is more important than ever for managers and investors to understand (i) the financial reporting process, (ii) what financial statements do and do not contain, and (iii) the types of discretion managers have in presenting transactions they have undertaken. This course is designed to help you become a more informed user of accounting numbers by increasing your ability to extract, interpret, and analyze information in financial statements.

We will focus on many of the biggest problem areas of financial reporting:

- The Financial Reporting Environment Post Enron and Post Meltdown
- Earnings Quality
- Cash Flow Quality
- Alternative Measures of Profitability
 - GAAP, Pro Forma, EBITDA, and the FASB's proposed new performance statement
- Earnings Per Share and Dilution
 - GAAP dilution vs Economic Dilution
- Revenue Recognition
- Fair Value and Mark to Market
- Derivatives
- Stock Options
- Intangible Assets
- Pensions
- Consolidation of Debt and "Off Balance Sheet" Debt
- Special Purpose Entities and Control
- Multinational Reporting – Currency Changes
- Segmental Reporting
- Income Taxes
- Sarbanes Oxley and International Financial Reporting Standards

While this is not a course in equity valuation *per se*, equity valuation is one of the most common uses of financial statement data. Accordingly, we will examine the relation between

stock prices and financial statement information. We will also study the use of financial ratios and forecasted financial statement data in models of distress prediction.

The course assumes a solid understanding of basic financial accounting (at the level of Acct 620/621).

Course Materials

Bulkpack The bulk pack is available at Study.net. In addition, virtually all of the material will be available in the eRoom for Acct 742 on Web Café.

Text: Revsine, Collins, Johnson, Mittelstaedt, *Financial Reporting and Analysis*, 4th ed., Prentice Hall, 2009. This text serves as a reference on accounting and disclosure topics. Note that the course is not a textbook-based course. Text readings provide supplementary information and information useful for preparing the problems and cases.

Web Café The course has a room on Web Café that you can log onto with your User name and Password. Within the Course Material folder, there is a folder for each class session, as well as one for the syllabus and the exams. Inside the folder for a given class session, you will see three or four subfolders:

Bulk Pack Material: This includes notes, problems, cases, and readings that were included in the bulk pack.

Pre Class Material: New readings, problems, and cases (ones not included in the course pack) are contained here. This folder will also have any spreadsheets available to help work the problems and cases. Finally, this folder will contain power point slides that will constitute the outline of what we'll cover in class that day. Many students find that printing out the slides before class helps them follow along better. Two to three slides per page is a good compromise between not using up too much paper and having room to jot down notes.

Solutions and Post Class Material: This is where I'll post solutions, corrections, etc

Office Hours

Feel free to call with questions or contact me via email at the address above. E-mail is often an easier and quicker way to get your questions answered.

Office Hours: Monday and Wednesday 12:00 – 1:15pm

Grading and Course Requirements

Your grade for the course will be determined on the basis of :

Class Participation	20 %
Midterm Examination	20 %
Group Project	25 %
Final Exam	<u>35 %</u>
Total	100 %

Class Participation

The amount of learning that takes place in the course will depend on how active the class discussions are, which is dependent on the amount of preparation you do before class. Class participation will be based on your contribution to the class discussions and analyses, not simply on the amount of time you talk. If necessary, I will cold call students.

Because entering or leaving the classroom during class time is disruptive to the learning environment, your fellow classmates and I expect that you will not do so, except in an emergency.

Please bring to each class a Name Card, with your name printed in **LARGE DARK LETTERS**. This will facilitate my getting to know your names and my ability to reward you for class participation.

Midterm Exam:

The Midterm Exam is scheduled to be available on Monday February 28 and is to be handed in by Thursday March 3 at 3:15. It is an open book-open notes exam. The Midterm Exam will cover material covered in class through Wednesday, February 23rd.

More details on the exam will be provided as the time gets closer.

You must work on the exam individually. You are not permitted to discuss the exam with anyone else, including other students, former students, or people in the real world. However, you are permitted to use any written resource, such as your notes, the textbook, information on the company you find on the web, etc. Violations of these procedures will constitute cheating and could result in receiving an F for the course.

Sample questions and solutions will be available from Web Café.

Group Project:

Your group must identify a firm that has been the subject of an accounting controversy (alleged or real). You can use internet search engines to help you pick your firm, SEC actions, etc. Choose a firm and accounting issue you are interested in.

Groups can be composed of up to 4 students. Groups may contain a mixture of students from my different sections. Group composition must be finalized by March 3 (just before Spring Break starts). In addition each group must obtain approval for the company they're going to work on by March 3. The earlier you decide on a company, the more time you'll have to work on it. I strongly encourage you to form your teams sooner than this and to get started on your project before this date as well.

Group Projects must be turned in by Monday April 4th at 3:30 pm

Please do not choose Enron, Sunbeam, Worldcom, Microstrategy, Computer Associates, or AOL. Moreover, do not choose any firm and their accounting controversy that we will be covering in class. For example, it's perfectly OK to pick a firm that has been found to have pension accounting, but don't pick American Airlines – because that's the pension case we'll be doing in class.

It's perfectly fine to pick a non-US company for your project.

Once you have identified a firm and its accounting controversy, send me an email letting me know who and what you've selected. Include a brief statement for what you believe the accounting issues for that firm are. An article from the financial press describing the controversy would probably work here. If I feel the firm/controversy is inappropriate, not complex enough, or too complex, I will veto it.

More details are provided below, and additional information will be provided during class and on the course web page.

First, find a company that has been criticized or investigated for some questionable *accounting practice*.

- Good places to search include popular press articles, analysts reports, or the SEC accounting enforcement page (<http://www.sec.gov/divisions/enforce/friactions.shtml>)
- Do *not* choose Enron, WorldCom, AOL, Sunbeam, or Microstrategy.
- Make sure that you choose a firm with questions about its accounting practices rather than a firm that has committed outright fraud. For example, a firm that ships empty boxes and books revenue is a fraud. A firm that ships actual product and books all of the revenue without any provision for bad debts has questionable accounting practices.
- Multiple groups can investigate the same company, but they *must* work *independently*!

- The degree of difficulty will be taken into account in grading your project. For example, if you investigate a firm with questionable pension accounting practices, which we will not cover in class until after the assignment is due, you will be given more slack in grading than if you investigate a simple revenue recognition issue. Thus, you are *encouraged* to investigate accounting issues that are difficult and that we haven't covered, or won't cover, in class.
 - Companies with problems that have occurred within the past 5 years will be given more credit than problems that occurred longer ago.
- You will need to find financial statements for the company. Search for the company on the SEC Edgar system (which can be accessed through the Lippincott Library page) or check out the company's web site to ensure you have access to financial statements.
- If you have any questions, please feel free to talk to me about your choice of company to investigate.

Once you have chosen a company, write a report on the company that addresses the following issues:

1. Describe the economic transaction(s) underlying the questionable accounting. Discuss the transaction in the context of the company's business and strategy (you may need to look in the company's annual report for this material).
2. Describe the accounting procedure used by the company and the accounting procedure that "should" have been used according to the critics of the accounting practice. Journal entries may be helpful here in laying out the accounting. What is the basis or justification for the company's accounting practices and for the alternative accounting practices in terms of accounting rules and concepts? How detailed or forthcoming about the accounting procedure was the company in its annual report prior to the controversy?
3. What indications were there (if any) of the problem that an astute analyst might have seen in advance?
4. Do you agree with the critics that the company's accounting practices were wrong, given your answers to the above questions? Why or why not? Note that, just because a company gets criticized for its accounting, it is not necessarily doing the wrong thing. Microsoft has been investigated by the SEC numerous times for questionable accounting practices and has been cleared every time. Are there changes to accounting or auditing standards you would recommend based on what happened?
5. If the company were to restate its financial statements using the accounting procedure that "should" have been used, what would be the effect on the a) income statement, b) balance sheet, and c) statement of cash flows? You do not have to replicate the entire statement; you just need to indicate changes (e.g., accounts receivable would increase, net income would decrease, etc.)
6. Why do you think the alleged problem occurred?

7. What were the consequences of the revelation/resolution of the problem? What happened to the firm's stock price? Did anyone get prosecuted or sent to jail? Were any fines levied? Etc.
8. Does the revelation of the company's alleged flawed accounting practices change your assessment of the company's long-run value? If so, how? If not, why not? Here I want something more substantive than the statement "value is based on cash flow, not on accounting numbers."

Hand in the following:

- A written report which addresses these issues. There is no page or word limit on your write up of this assignment, but please use 12 pt. font and at least a 1" margin on each side.
- The article, analyst report, or SEC enforcement bulletin that alerted you to the situation.
- The most recent set of financial statements issued by the company prior to the controversy.
- Any other exhibits or material to support your analysis.

Final Exam

The final exam will be a take-home exam. While it is "officially" cumulative, it will concentrate on material covered since the midterm exam.

The final exam is a take home that will be distributed shortly after the last day of class – roughly Friday April 29. It is due (in the accounting suite- 1300 SH-DH) on Friday May 6th at 1 pm.

More details on the exam will be provided as the time gets closer.
Sample questions and solutions will be available from Web Café.

You must work on the exam individually. You are not permitted to discuss the exam with anyone else, including other students, former students, or people in the real world. However, you are permitted to use any written resource, such as your notes, the textbook, information on the company you find on the web, etc. Violations of these procedures will constitute cheating and could result in receiving an F for the course.

Grading Disputes

All grading disputes must be appealed within *two calendar weeks* following the return of the assignment or exam (unless otherwise noted). *A request for a regrade will not be considered if it is submitted more than two week after the return of the assignment or exam (or after the specified deadline).* To have an assignment or exam regraded, you must submit the original (with no modifications) and a written description of your disagreement with the initial grade.
