Course Description

This course examines the legal issues of real estate financing with an emphasis on commercial transactions. The main topics covered are acquisition, construction and permanent financing, development and management aspects, with a focus on examining the fundamentals of real estate finance and development from a legal perspective. The course serves as a foundation course for real estate majors and provides an introduction to real estate for other students. It attempts to develop skills in using legal concepts in a real estate transactional setting. The course will be of interest to students contemplating careers in accounting, real estate development, real estate finance, city planning, or banking. The main topics covered may include the following: land acquisition; finance; choice of entity; tax aspects; management (leasing, environmental); disposition of real property (sale of mortgaged property, foreclosures, wraparound mortgages, sale-leasebacks); and recent legal developments.

IF YOU DECIDE TO DROP THE CLASS, YOU MUST DO SO BEFORE THE FIRST EXAM. NO EXCEPTIONS!

Description of projects: One project will be due during the semester. The project will be done in approximately groups of four. I will select students to make up the groups. The project will require the group to analyze a potential commercial real estate development, negotiate a resolution with an opposing group, and submit their solution by the date specified. In that case, I will assign grades on an individual basis.
