Instructor: Alexander Rakhlin  rakhlin@wharton  465 JMHH  215-573-3637

Classes meet:  Section 002, Tue/Thu  12:00-1:30,  in G60 JMHH
              Section 003, Tue/Thu  1:30-3:00,  in G60 JMHH

Office hours:  Mon & Wed  3:00-4:00pm,  465 JMHH

Teaching Assistants
Name:          E-mail:            Office:          Office Hours:
Wei Han        wehan@wharton      427.2            Mon 6-7pm, Tue 5-6pm
Julie Novak    julnovak@wharton  431.2            Wed 5-6pm, Thu 4-5pm
Tung Phan      tungphan@wharton  433              Fri 1-2pm, Sun 11am-12pm

Contact: Your primary source for questions and answers should be the Canvas discussion board (see below). Questions on homework should be addressed to the TAs. Administrative issues and questions on the exams should be addressed to the Professor.

NOTE: Section 001 (Mon/Wed 1:30-3:00) taught by Professor Ewens follows a different syllabus, with separate homework and exams.
Course websites

Statistics 101 is using (a) Canvas and (b) a separate wiki page.

a. You can gain access to Canvas by going to https://wharton.instructure.com/. Materials for this course will be distributed and managed via this website, and you will be able to monitor your grade entries throughout the semester. An important feature of Canvas is the discussion board where everybody can place questions and comments. We will be using it extensively for answering your questions about homeworks, exams and scheduling. You are urged to go here first to see whether your question has already been asked and answered, and, if not, to place your question so it can be answered once for everybody.

Note for non-Wharton students: If you do not have a Wharton computing account, you will need to establish one to access the website. The account also provides access to the computing labs in Wharton and to the intranet. To get an account, on or after the first day of classes, go to http://accounts.wharton.upenn.edu. After you have obtained your account, allow up to 12 hours for activation.

b. In addition to Canvas, some course notes will be posted on a wiki here:
   http://stat.wharton.upenn.edu/~rakhlin/wiki/

Course Overview

This course develops ideas for helping to make decisions based on data. Some of the following material will be covered: data displays (including boxplots, histograms, scatterplots), summary statistics (including mean, standard deviation), uncertainty and probability as limiting relative frequency, the normal distribution as a reference standard, statistical estimation and tests, including standard errors, confidence intervals, p-values.

The course does not dwell on the details of computation—its main focus is on understanding a few deep concepts and interpreting data and statistical results.

Course Materials

• Textbook: Statistics for Business by Stine and Foster
• Computer software: JMP 9, available at http://upenn.onthehub.com (3-year license for $59.95) Make sure to select your platform (Windows/Mac).

The software will also be used in Stat 102. If you have a Mac or any version of Windows you should have no problems. Here, too, you can save the money by just working on public Wharton computers, all of which have JMP installed.
If the textbook is not sufficient, you may consult other books, such as “The Practice of Business Statistics” by Moore, McCabe, Duckworth and Sclove, or “Statistics” by Freedman, Pisani and Purves.

**Homework**

- There will be about 10 homework assignments.
- Homeworiks will be assigned on Canvas and will usually be due a week later. They will not be accepted late except for valid reasons. Back up your work frequently on a data stick, so you can submit it from a Wharton computer if yours breaks down.

- *Hand in a stapled paper copy of your solutions in the Statistics Department (JMHH, 4th floor, turn right exiting from the elevator) in the box marked with your section (not in class and not to the TAs).*

- If you are unable to submit your homework for any reason (computer broken, health problem, …), send emergency e-mail to either TA or your instructor.

- Your solutions must have on the cover page your
  - Name
  - Section and Time
  - Professor

- Homework is designed to teach, and you are encouraged to seek help from the instructor and the TAs if you have questions. You may also work with and help each other. You must, however, submit your own solutions, with your own write-up and in your own words. There can be no collaboration. Failure to comply will result in severe penalties.

- Graded homework will be returned in the same boxes in the Statistics Department.

- Scores for homeworks are finalized one week after the graded copies are handed back. Thereafter there will be no changes and no re-grading. Do not delay checking your graded homeworks to the end of the semester.

**Examinations**

One midterm examination will be held Thursday, October 27 from 6-8pm
The final examination will be Friday, Dec 16, 6:00-8:00pm.
The room assignments will be announced on Canvas closer to the exam dates.
During examinations strict rules will be in effect with regard to honor code.

**Grading and Grading Policy**

Your course grade will be calculated as 20% homework, 30% midterm examination, and 50% final examination. (What this means will be discussed during the semester.)
