This course is an introduction to the critical management skills involved in planning, structuring, controlling and leading an organization. It provides a framework for understanding issues involved in both managing and being managed, and it will help you to be a more effective contributor to organizations that you join. We develop a “systems” view of organizations, which means that we examine organizations as part of a context, including but not limited to environment, strategy, structure, culture, tasks, people and outputs. We consider how managerial decisions made in any one of these domains affect decisions in each of the others.

MATERIALS:
We use a variety of source materials. The custom text “Introduction to Management” (Rosenkopf and Haas, MGMT-101) can be purchased in either electronic form through the McGraw-Hill site (https://wharton.instructure.com/courses/411675/assignments/1247838) at a price of $50 or in print form through Wharton reprographics at a price of $65. Note that the electronic textbook chapters are directly accessible from Canvas, but your access only lasts for 180 days. Week 1 materials are accessible via Canvas without a book purchase to give you time to decide which form of the book you might prefer. One multimedia case on CD-ROM should be purchased at Wharton reprographics as well. All other materials are available at no additional charge to you, either in the public domain or through the Penn library system, and are linked directly from the weekly reading and assignment summaries on Canvas. Please note that we cover material in lecture that is not included in the readings, yet is fair game for the final exam. If you cannot attend lecture, each week’s session is taped and available at https://spike.wharton.upenn.edu/media/index.cfm for your review.

GRADING:
The following components will be used to determine your course grade:

- Two short response papers (5 points total)
- Recitation attendance/preparation/participation (25 points)
- Group project (20 points)
- Midterm exam (20 points)
- Final exam (30 points)

Each assessment is explained in detail on Canvas under “Assignments”. To ensure consistency in grading across the full set of students, recitations and TAs, each of the prior components will be normalized before a composite grade is calculated. While the exams will be normalized across the full set of students taking the course, the other components will be normalized for each TA or recitation.

IMPORTANT NOTE: All students are responsible for reading, understanding and following the policies posted on Canvas regarding assignments, attendance, grading, integrity, and plagiarism.
