Course Overview

This course focuses on international comparisons of housing finance systems and housing market outcomes. The recent housing finance crisis is highlighted in the US and Europe. The course covers includes comparative analyses of housing market differences and similarities across countries. The course also addresses the implications of the ongoing integration of global financial markets for national housing markets. Speakers present their views on institutional innovations and the policy setting process. Various approaches to understanding these issues are used, including readings, written assignments, and group projects.
