Objectives The purpose of this course is to apply economics to an analysis of the health care industry, with special emphasis on the unique characteristics of the US healthcare markets, from pre-hospital to post-acute care. This course focuses on salient economic features of health care delivery, including: the role of nonprofit providers, the effects of regulation and antitrust activity on hospitals, the degree of input substitutability within hospitals, competition in home health care, public versus private provision of emergency medical services, the effect of specialty hospitals and ambulatory surgery centers, innovative models of primary care delivery, defining and improving medical performance in hospitals, specialization and investment in physical and human capital, and shifting of services between inpatient and outpatient settings and its effect on health care costs and quality.

We have established a CANVAS room for HCMG852. This will serve as our primary communication channel. All class materials will be posted there. The URL for CANVAS is:

<https://wharton.instructure.com/courses/1256436>. You can log on using your usual Wharton username and password. Registered students will automatically have access. If you are not a Wharton student, you can get an account online at: <http://accounts.wharton.upenn.edu>. In case of any problems, you can apply in person at F35 JMHH, which is the Wharton computer consulting office. If you have questions about using CANVAS, contact the CANVAS Team at: courseware@wharton.upenn.edu.
