

UNIVERSITY OF PENNSYLVANIA

THE ECONOMICS AND FINANCING OF HEALTH CARE DELIVERY

HCMG202 | ECON039

COURSE DETAILS

This syllabus is a general plan for the course. Deviations will be necessary and announced in advance in class or on Canvas. There is no formal attendance policy. There are no pre-requisites.

- Time: Mondays and Wednesdays, 10.30-12.00
- Place: Lauder Fischer Hall Auditorium
- Instructor: Molly Candon, PhD
- Office: 3535 Market Street, 3rd Floor, Room 3048
- Email: candon@wharton.upenn.edu
- Office Hours: Tuesdays from 4.00-5.00 in the faculty lounge of Colonial Penn Center and by appointment
- Teaching Assistant: Atasha Jordan, MD/MBA Candidate
- Email: atasha@wharton.upenn.edu

COURSE OVERVIEW

By recognizing the importance of scarcity and incentives, the Economics and Financing of Health Care Delivery focuses on the critical economic issues we face when consuming, producing, delivering, and financing health care. This course will analyze the demand for and supply of health care and insurance; the unique roles of patients, providers, payers, and other industries in health care delivery; and the economic phenomena pervasive in the market for health care, including asymmetric information, externalities, and the lack of price transparency. Time permitting, other topics will include mental health care, the opioid epidemic, and behavioral economics in health care. Special emphasis will be placed on market failures and the evaluation of public and private solutions, as well as the ability to dissect economic and political issues in ongoing policy debates.

ACADEMIC INTEGRITY

All work must meet the standards of the University of Pennsylvania's Code of Academic Integrity. Lack of knowledge of these policies does not excuse a violation. Working together is allowed on problem sets, but all work should stand alone.

MATERIALS

- Slides and assignments will be uploaded to Canvas. Academic articles, which are required reading, are in the study pack. News articles will be linked to my Twitter—my handle is @mollycandon.
- If you would like additional readings to complement the in-class material, there are two optional textbooks for purchase: Phelps' Health Economics and Feldstein's Health Policy Issues: An Economic Perspective. Old editions are fine but the chapters may differ from those listed on the syllabus.
- An excellent resource for economic theory is McCloskey's The Applied Theory of Price, 2nd Edition, which is available for free on her [website](#).
- Without my approval, laptops and similar devices aren't allowed out during class.

GRADING POLICY

- The course will consist of two exams (40%), four problem sets (40%), and a 2,500-word research brief (20%).
- I reserve the right to determine letter grade cutoffs at the end of the semester.
- Grading concerns must be presented to me in writing within one week of when the problem sets/exams are handed back in class.
- Problem sets are due at the beginning of class because we will immediately review them. If you did not hand in your problem set and plan to submit it late, do not come to the first half of the classes in which they're due.
- Exam make-ups and assignment extensions require documentation that specifies the dates the student is unable to work and will be given at my discretion. Without documentation, there will be a 20-point late penalty.

IMPORTANT DATES

- Problem Set 1: Wednesday, February 6
- Problem Set 2: Monday, February 25
- Exam 1: Wednesday, February 27
- Problem Set 3: Monday, April 1
- Problem Set 4: Monday, April 29
- Exam 2: Wednesday, May 1
- Research Brief: Friday, May 10

COURSE SCHEDULE

January 16, 23, 28, 30

Introduction

- Papanicolaos I, Woskie LR, Jha AK. Health Care Spending in the United States and Other High-Income Countries. *JAMA*. 2018, 319(10): 1,024-1,039.
