## ***I. OVERVIEW AND PROCEDURES***

Designed for students with a serious interest in entrepreneurship and being entrepreneurial, this course will provide you with an advanced theoretical foundation and a set of practical tools for the management of startups and entrepreneurial teams in fast-changing and innovative environments. Building on the skills of Management 801, every class session is built around an experience where you have to put learning into practice, including the award-winning Looking Glass entrepreneurial simulation and the Saturn Parable. The goal is to constantly challenge you to deal with entrepreneurial or innovative experiences, as you learn to navigate complex and changing environments on the fly, applying what you learned to a variety of scenarios. Management 802 is built to be challenging and will require a desire to deal with ambiguous and shifting circumstances, where the meaning is not always clear upfront.

Prerequisites: MGMT801 strongly suggested

## ***II. GRADING***

60% Looking Glass/Active class participation  
40% Reflection Essays

**Active Class Participation/Looking Glass (60%)** You are expected to come to class well prepared to discuss and participate. Class attendance is very important in this course. Simulation participation and thoughtfulness will be graded continuously.

On Looking Glass Expect to spend 3-4 hours a week, outside of class time, doing the simulation while it runs. You will also complete a peer review that will play into final grades. Missing any Looking Glass or Saturn Parable classes without prior notice will have a large impact on your final grade.

**Reflections (40%)** Reflections allow you to make sense of your own learning. Individual assignments will be described on Canvas.

### ***III. Readings***

There are no readings, outside of those in the simulation

### ***III. Academic Honesty***

*Academic Honesty:* **Under no circumstances should you pass off the work of another as your own.** That means that you must cite sources, and, if quoting a source, properly indicate which material is quoted and which is original work – never just copy and paste material from a source into a paper. Failure to properly attribute work will result in, at a minimum, a failing grade for an assignment

*Research:* Please note that I gather data from class for relevant research to improve entrepreneurial pedagogy. Any research will only present data that has been anonymized and aggregated. Some classes may be recorded for students who cannot make it. If you have any questions about this policy, do not hesitate to ask.
