EMPIRICAL MODELS IN MARKETING  
(MKTG 9560)  
Spring 2023  

Professor Eric T. Bradlow  
The K.P. Chao Professor  
Professor of Marketing, Statistics and Data Science, Economics and Education  
Vice-Dean, Analytics at Wharton  

Professor Raghu Iyengar  
Miers-Busch, W’1885 Professor  
Professor of Marketing  
Faculty Director, Wharton Customer Analytics  

Friday 10am – 1:00pm  

Objectives:  
This seminar-based class is designed to introduce doctoral students to the fundamental empirical models and estimation methods utilized in quantitative academic marketing papers. That is, if this class is successful, you should know the basic purpose, data requirements, mathematical formulation, and equally important the jargon/verbiage, associated with a wide assortment of quantitative marketing models.  

Outline of Each Class Session:  
Each class session will have a similar structure. We will review two published papers (in some rare cases possibly three), consisting of a “classic marketing paper” that seminaly introduced a concept/model to the literature, followed by a more recent updated version of the same concept. In this manner, students will become familiar with the tradition of marketing science, but also gain knowledge of “modern updates” to those papers. Given that only two papers are assigned for each week, a deep and detailed coverage of each paper, with detailed pre-reading on the students’ part, is expected.  

Course Materials and Website:
Copies of the papers sit on the course canvas site which can be accessed by logging into (https://wharton.instructure.com/login).

Grading:

Your grade in the course will consist of three parts.

(i) Each week, you are required to turn in AT THE BEGINNING OF CLASS, a no more than 5-page summary of the papers from that week. These short summaries will be graded based on your ability to: (i) concisely summarize the papers, (ii) provide a description of opportunities to extend these papers into novel research areas, (iii) your ability to raise critical questions about any aspect of the paper of your choosing, and (iv) most importantly, tie one or more of the papers to a problem that YOU ARE WORKING ON.

(ii) The reason that we are meeting as a class is for you to share your ideas with others. Come to class prepared to discuss both papers that are assigned.

(iii) As a final project, I will ask each of you to construct a no more than 30-minute presentation summarizing “Lecture N+1”. That is, if there was one additional lecture, what would it be on? You pick the paper, or two papers, write up a summary of them (20 pages or less), and prepare a presentation on the topic.

Course Outline

Session

1. January 13th  
   Choice Models/Loyalty
   

2. January 20th  
   Conjoint Analysis
   

3. January 27th  
   CLV/Attrition Models
   

4. February 3rd  
   Integrated Models for Multiple Outcomes
   

5. February 10th  
   Learning Models
   

6. **February 17th**  
   WHARTON MARKETING CAMP

7. **February 24th**  
   Heterogeneity / HMM

8. **March 3rd**  
   Lecture N+1 (Bradlow and Iyengar)
