Description  
The environment of business has market and nonmarket components. The market component is characterized by the economics of an industry and a firm’s position in it. The nonmarket component is the broader political, regulatory, legal and civil context in which companies function. This course will focus on various dimensions of the nonmarket context. We will devote considerable attention to understanding where economic policy comes from, and how economic policy addresses important market failures. Most lectures will present one or more focal economic concepts and analyze an application in reference to the concepts. The applications will be drawn from around the world.  

Given the emphasis of the course on economic and political institutions and market issues in emerging markets, BEPP 203 counts towards the “Global Economy, Business and Society” flex fundamentals.  

Reading Material  
The following book will be used in the course:  

It is not necessary to purchase the VHV book as these readings will be available both on electronic reserve and on reserve at Lippincott library. When a web link is provided for an article in the syllabus you should directly download the article for that link. All of the other articles can be obtained either from the Canvas course site or from the web. There will also be optional readings, drawn from a range of sources. These optional readings, all of which are available on
Canvas and online, are listed as “suggested” in the reading list below. Additional material such as PowerPoint slides from the lectures will be posted on Canvas.

**Writing Assignment**

There is a mandatory writing assignment for this course. You will be given the option of addressing one of several pre-selected questions in 500 words (or less). The purpose of this assignment is to give you practice in making analytical arguments in a clear and succinct manner; this is an attempt to give Wharton undergraduates more writing experience. The schedule below indicates the due date for the assignment. No credit will be given for late assignments. Requests for re-grades of writing assignments must be submitted in writing within one week of the date that the assignments are handed back.

**First and Second Exam**

Closed book exams will focus on the economic concepts and applications from the first part of the course (first exam) and the second part of the course (second exam). Students will be given a period of one week from the date that the exam is made available to request a re-grade. The BEPP Department maintains a photocopy of all exams. All requests must be made as a message sent on Canvas to the professor stating the specific reasons for the re-grade (i.e. specific questions, and why they believe the answer was graded incorrectly) no later than the close of business on the day which is one week after the exam is made available. Re-grades will be returned to the student as soon as available. Note that the entire exam will be reviewed during a re-grade, not only the questions/answers requested, and a re-grade may be higher or lower than the original grade. We have established this re-grade procedure to ensure fairness for all students. The professors will not discuss specific exam questions until the re-grade period is over.

**Code of Academic Integrity**

All students enrolled in courses in the Business Economics and Public Policy Department are expected to comply with the University of Pennsylvania’s Code of Academic Integrity. We encourage all students to read the Code so that they are well aware of all situations that would be considered a violation.

It is the policy of the Department of Business Economics and Public Policy to immediately fail any student who is to be in violation of the Code. Cheating, in any manner, on a graded assignment, exam, or the presentation will result in failing both the assignment/exam and the course. In addition to the sanctions imposed by the Department of Business Economics and Public Policy, the Office of Student Conduct may impose additional sanctions.

Please review the Code of Academic Integrity on the below link as well as example of violations and possible sanctions: [https://catalog.upenn.edu/pennbook/code-of-academic-integrity/](https://catalog.upenn.edu/pennbook/code-of-academic-integrity/)
Class Participation
You are expected to come to class prepared. The required readings, and ideally also the additional suggested readings, should be completed before class, and you should be ready to discuss the economic concepts and the details of the cases when you arrive. The instructor may cold-call and solicit classroom comments. Successful participation in class and in your presentation group will reflect positively on your class participation grade, as will regular attendance and on-time arrival. Submission of student presentation peer feedback forms will also reflect on your class participation grade.

If you are going to miss class for a medical or non-medical reason please do not contact the professor directly, but instead use the official Course Absence Report system through the UPenn Registrar.

Team Presentations
Overview: Students will be in teams of about 4 to 6 students, depending on class size. Presentations should explore and communicate your research on the topic as it relates to economic concepts from relevant sessions in this course.

Format: You are (essentially) free to choose the format of your presentation. It is acceptable to use a straight-forward Power Point presentation, but you are encouraged to consider other formats, such as:

- A media press interview or game show
- A congressional or regulatory hearing enactment (real or imagined)
- An internal business strategy deliberation among a firm’s decision-makers and advisors

You should try to be creative in choosing the format that best communicates the substantive issues involved and how they relate to the topics of BEPP 203. Presentations that emphasize analytical thinking (by you, the firms involved, the policy-makers, opponents to a policy change, etc) are better than factual summaries of the issue. Make sure to clearly explain any course concepts you use as opposed to mentioning but not providing complete explanations. Do not include videos produced by other organizations (it is fine to include videos produced by your presentation group). We encourage you to integrate insights from other Wharton classes, research, reports, etc. but your slides should be your own work and you should cite all sources you use. Try to make it fun, but keep it clean, and keep it professional.

Each group presentation should run twenty-three minutes in total. This includes both time for the presentation and audience participation through either a Q&A session or other means.

You should take advantage of your team assistant (TA). The TA is there to provide feedback at both the formulation phase and the rehearsal phase. Ideally, you should rehearse, reformulate, and rehearse again in the last few days before your presentation.

Citations: You are allowed to use figures, graphs, etc. from existing research but you should put a citation on the slide whenever you use such materials to indicate attribution. You should also include a works cited at the end of the presentation. We expect that you will not copy whole slides or longer portions of other presentations for use in this class.
**Hand in:** Team participants must hand in a print out of the complete PowerPoint (or pdf) slides at the beginning of class on the day of the presentation, and the slides must also be submitted by email (cc’ing all teammates) by 9am on the day of the presentation. Please name the file with your topic.

**Topics, Dates, and Sign-up Logistics:** Presentation sign-ups will occur after the first few weeks of class. No changes in groups can occur after the sign-up date. There are no exceptions to this policy.

**Grades:** The professor will grade each team project, using as a guide the feedback of your fellow students, as well as instructor judgment about the content and structure of the presentation, and in particular the relevance of the economic concepts used and comparison to relevant cases. Each team project will receive one group grade. All students in the team will receive the same grade for their team assignment. Students who fail to participate fully in team presentations will lose credit on their class participation grade.

**Tutoring Support**
Students experiencing difficulty in this course should seek assistance from the Penn Tutoring Resource Center. Refer to the Wharton Undergraduate homepage for the schedule of walk-in tutoring hours. Private tutors from the Tutoring Center can be obtained (without cost) through the recommendation of a professor or professional advisor in the Undergraduate Division. Students who wish to inquire more about tutoring, study skills, learning disabilities, test-taking strategies, time management, or reading/writing coaching should call the Weingarten Learning Resources Center (215-573-9235) for more information.
