Overview and Procedures
You may want to start a new venture upon graduation. Even more likely, you may find yourself launching a new venture as your career develops. You may find yourself working for an entrepreneur, funding entrepreneurs, or having to work with them. Or you may simply want to be more entrepreneurial in your own career. The purpose of Management 801 is to be helpful to you under any of these circumstances with a whirlwind tour of the many dimensions of new venture creation and growth. We will be concerned with issues that relate to conceptualizing, developing and managing successful new ventures.

As the entry level course in Entrepreneurial Management, MGMT 801 also serves a gateway for other courses that will allow you to further pursue your interests in specific entrepreneurship domains (e.g. venture capital investment) through Wharton Entrepreneurship.

The class is highly experiential and hands-on, combining interactive classroom sessions with a startup hackathon designed to familiarize you with the many dimensions of entrepreneurship. Most of the examples we discuss in class will relate to venture formation, but the underlying the interdisciplinary principles – drawn from applied economics and organizational behavior to strategy and finance – will also apply to entrepreneurship in corporate settings and to non-profit entrepreneurship.

Grading
50% Class Participation
35% Team Hackathon
5% Individual Idea Assignment
10% Individual Final Reflection Essay
Class Participation (50%)

1) Attendance and Participation (20%): You are expected to be present during class and well prepared to discuss the case studies and reading materials. Participation is based on the quality, rather than the quantity, of your comments. Completing the assigned reading(s) and prep memo will help prepare you to contribute in class with high-quality comments. Everyone is allowed 1 absence; each absence beyond this will result in a reduction of 3 percentage points in the total attendance score.

2) Memos (30%): You will need to complete a prep memo and a review memo for each non-hackathon class session. These short memos are designed to help maximize your learning from this quarter-length course. Prep memos are due at 9 PM the night before the next class. Review memos from the focal class are due at 9 PM the night before the next class.

Individual Idea Assignment (5%) 
Each student will independently develop two startup ideas. For idea #1, explore newly patented technologies in our Penn ecosystem and develop a startup idea (i.e., a commercial application) based on a chosen technology. For idea #2, identify a “pain point” that you or someone you know have experienced and develop a startup idea in response. Further details to be discussed in class and described on Canvas.

Team Hackathon (35%)
For most of the class, you will work in a team (4-7 people) to test and develop a new venture idea. Ultimately, each team will present a final pitch deck that covers all key aspects of the venture towards the end of this course. This hackathon will contain 4 deliverables throughout the course (listed below):

Team-based Deliverables (must submit directly via Canvas):

The Hackathon Guide on Canvas provides specific instructions for each deliverable.

1. Team Registration (5%): Each team will register by listing its members and also briefly describe the venture such as the problem your team seeks to address.
2. Customer and Problem Discovery (10%): This exercise will lead teams to gain first exposure to potential customers and begin hypothesis formation and testing.
3. Entrepreneurial Strategy (10%): Each team will examine its unique competitive landscape and choose an entrepreneurial strategy.
4. Final Pitch Deck (10%): To conclude the hackathon, each team will submit a final pitch deck – the final file to be used in the actual pitches during the last class. Again, the Hackathon Guide provides specific instructions along with the criteria used to evaluate the quality of the pitches.

Pitching & Team Formation
During the hackathon kickoff, each student will pitch 1 idea that they are potentially interested in developing during the course. Based on these initial pitches, we will form teams during the

session. Specific instructions for pitching and team formation will be provided during the prior class and on Canvas (“Hackathon Guide: Kickoff”).

**Peer evaluation**
The individual grade on the group assignments will be weighted based on peer review. You will be asked to rate the contribution of each member of your team by assigning a percentage score that reflects their effort. Therefore, individual grades are likely to vary within each team.

**Individual Final Reflection Essay (10%)**
In a short essay (no more than 700 words), please reflect on the two following prompts:

1. First, review the core concepts and examples covered in our course from the slides (uploaded in /Files/Slides/). Pick one key conceptual takeaway and reference the session during which it was covered. Explain the concept in your own words and why it’s important.
2. Reflect back on your pre-MBA work experience and answer the two following prompts:
   (a) Provide an assessment of this organization’s need, then-current approach, and effectiveness in its approach (if any) to innovation and/or entrepreneurial process. Describe one core challenge the organization faces in this regard.
   (b) Drawing on the takeaway insight(s) you highlighted in response to Question 1, devise and describe one concrete action this organization can apply to improve its approach to innovation and entrepreneurship.

**Course Policy**

**Course meals (optional)**
As a chance to connect outside class and get to know each other, I will be hosting a weekly lunch or dinner at a restaurant near campus. Each meal is capped at 6 students on a “first come, first served” basis. Sign-ups are available on Canvas under the Calendar tab.

**Moderate use of generative AI permitted**
You may use generative AI programs (e.g., tools like ChatGPT) to help generate ideas and brainstorm. However, you should note that the material generated by these programs may be inaccurate, incomplete, or otherwise problematic. Beware that use may also stifle your own independent thinking and creativity. You may not submit any work generated by an AI program as your own. If you include material generated by an AI program, it **must be cited like any other reference material** (with due consideration for the quality of the reference, which may be poor). Any plagiarism or other form of cheating will be dealt with severely under relevant Penn policies.

**No mobile phones or laptops in class**
Please refrain from using your laptop computer or tablet in class as you will not need it for our classroom discussions. Research has shown that such devices reduce your own learning as well as that of other students as they get distracted. The only exception is the hackathon work session.
Course Outline
All required readings, hackathon materials, and memo questions are posted on Canvas.

* This session will be held in Venture Lab (Tangen Hall, Room 708), rather than our normal classroom.
Readings

Session 2: Startup Teams
- Book chapter: "Chapter 1 – Founders" in The Unicorn’s Shadow by Ethan Mollick
- Case study: Evan Williams, HBS case 9-809-088

Session 5: Hypothesis Testing
- Case study: Rent the Runway, HBS Case 9-812-077

Session 7: Choosing Your Strategy

Session 8: Financing
- Book chapter: “How to Raise Money” in Venture Deals by Brad Feld and Jason Mendelson
- Book chapter: “Chapter 5 – Growth” (only pages 65-71) in The Unicorn’s Shadow by Ethan Mollick

Session 9: Scaling and Managing Growth
- Case study: Beepi, MIT Case

Session 10: Exits – IPOs and Acquisitions
- Book chapter: “Harvest Time: Reaping What You've Sown” (only pages 1-13) in Entrepreneur's Toolkit

Session 12: Corporate Entrepreneurship
