

EMPIRICAL MODELS IN MARKETING
(MKTG 9560)

Fall 2024

Professor Eric T. Bradlow
The K.P. Chao Professor
Professor of Marketing, Statistics and Data Science, Economics and Education
Vice-Dean, AI and Analytics at Wharton

Professor Raghu Iyengar
Miers-Busch, W'1885 Professor
Professor of Marketing

Thursday 1:45-4:45, 757 JMHH

Objectives:

This seminar-based class is designed to introduce doctoral students to the fundamental empirical models and estimation methods utilized in quantitative academic marketing papers. That is, if this class is successful, you should know the basic purpose, data requirements, mathematical formulation, and equally important the jargon/verbiage, associated with a wide assortment of quantitative marketing models.

Outline of Each Class Session:

Each class session will have a similar structure. We will review two published papers (in some rare cases possibly three), consisting of a “classic marketing paper” that seminally introduced a concept/model to the literature, followed by a more recent updated version of the same concept. In this manner, students will become familiar with the tradition of marketing science, but also gain knowledge of “modern updates” to those papers. Given that only two papers are assigned for each week, a deep and detailed coverage of each paper, with detailed pre-reading on the students’ part, is expected.

Course Materials and Website:

Copies of the papers sit on the course canvas site which can be accessed by logging into (<https://wharton.instructure.com/login>).

Grading:

Your grade in the course will consist of three parts.

- (i) Each week, you are required to turn in AT THE BEGINNING OF CLASS, a no more than 5-page summary of the papers from that week. These short summaries will be graded based on your ability to: (i) concisely summarize the papers, (ii) provide a description of opportunities to extend these papers into novel research areas, (iii) your ability to raise critical questions about any aspect of the paper of your choosing, and (iv) most importantly, tie one or more of the papers to a problem that YOU ARE WORKING ON.
- (ii) The reason that we are meeting as a class is for you to share your ideas with others. Come to class prepared to discuss both papers that are assigned.
- (iii) As a final project, I will ask each of you to construct a no more than 30-minute presentation summarizing “Lecture N+1”. That is, if there was one additional lecture, what would it be on? You pick the paper, or two papers, write up a summary of them (20 pages or less), and prepare a presentation on the topic.

Course Outline

Session

1. October 17th

Choice Models/Loyalty

Paper 1: Guadagni, P.M. and Little, J.D.C. (1983), "A Logit Model of Brand Choice Calibrated on Scanner Data", *Marketing Science*, Vol. 2, No. 3, pp 203-238.

Paper 2: Dube, J-P, Hitsch, G, and Rossi, P.E. (2010), "State Dependence and Alternative Explanations for Consumer Inertia", *RAND Journal of Economics*, Bol. 41, No. 3, pp 417-445.

2. October 28th

Conjoint Analysis

Paper 1: Marshall, P. and Bradlow, E.T. (2002), "A Unified Approach to Conjoint Analysis Models", *Journal of the American Statistical Association*, 97:459, pp. 674-682.

Paper 2: Iyengar, R., Jedidi, K, and Kohli, R. (2008), "A Conjoint Approach to Multipart Pricing", *Journal of Marketing Research*, Vol. XLV, pp. 195-210.

3. October 31st

CLV/Attrition Models

Paper 1: Schmittlein, D.C., Morrison, D.G. and Colombo, R. (1987), "Counting Your Customers: Who Are They and What Will They Do Next?", *Management Science*, Vol. 33, No. 1, pp. 1-24.

Paper 2: Schweidel, D. A. and Knox, G. (2013), "Incorporating Direct Marketing Activity into Latent Attrition Models," *Marketing Science*, 32 (3), pp. 471-487.

4. November 7th

Integrated Models for Multiple Outcomes

Paper 1: Chintagunta, P.K. (1993), "Investigating Purchase Incidence, Brand Choice and Purchase Quantity Decisions of Households, *Marketing Science*, Vol. 12, No. 2, pp. 184-208.

Paper 2: Gupta, S. (1988), "Impact of Sales Promotions on When, What and How Much to Buy," *Journal of Marketing Research*, 30 (4), 342-355.

5. November 14th

Learning Models

Paper 1: Erdem, T. and Keane, M.P. (1996), "Decision-Making under Uncertainty: Capturing Dynamic Brand Choice Processes in Turbulent Consumer Goods Markets" *Marketing Science*, Vol. 15, No. 1, pp. 1-20.

Paper 2: Iyengar, Raghuram, Asim Ansari and Sunil Gupta (2007), “A Model of Consumer Learning for Service Quality and Usage,” *Journal of Marketing Research*, 44 (4), 529-544.

6. November 21st Heterogeneity / HMM

Paper 1: Rossi, P.E., McCulloch, R.E., and Allenby, G.M. (1996), “The Value of Purchase History Data in Target Marketing”, *Marketing Science*, Vol. 15, No. 4, pp. 321-340.

Paper 2: Kamakura, Wagner and Russell, Gary. (1989), “A Probabilistic Choice Model for Market Segmentation,” *Journal of Marketing Research*, 26, 379-390.

Paper 3: Netzer, O., Lattin, J.M., and Srinivasan, V. (2008), “A Hidden Markov Model of Customer Relationship Dynamics”, *Marketing Science*, Vol. 27, No. 2, pp. 185-204.

7. December 5th Lecture N+1 (Bradlow and Iyengar)
